

### ■ Features

- Constant Current mode output with multiple levels selectable by dip switch
- Plastic housing with class II design
- Built-in active PFC function
- Standby power consumption <1W
- Functions: 3 in 1 dimming (dim-to-off); Auxiliary DC output; synchronization up to 10 units
- 3 years warranty

### ■ Applications

- LED indoor lighting
- LED office lighting
- LED architectural lighting
- LED panel lighting

### ■ Description

LCM-60 series is a 60W AC/DC constant current mode output LED driver featuring the multiple levels selectable by dip switch. LCM-60 operates from 180~295VAC and offers different current levels ranging between 500mA and 1400mA. Thanks to the high efficiency up to 92%, with the fanless design, the entire series is able to operate for -30°C~+90°C case temperature under free air convection. LCM-60 is equipped with various functions, such as the dimming function and synchronization, so as to provide the optimal design flexibility for LED lighting system.

**■ BLOCK DIAGRAM**

**■ DIP SWITCH TABLE**

LCM-60 is a multiple-stage constant current driver, selection of output current through DIP switch is exhibited below.

Io \ DIP S.W.	1	2	3	4	5	6
500mA	----	----	----	----	----	----
600mA	ON	----	----	----	----	----
700mA(factory default)	ON	ON	----	----	----	----
900mA	ON	ON	ON	----	----	ON
1050mA	ON	ON	ON	ON	----	ON
1400mA	ON	ON	ON	ON	ON	ON

**■ DIMMING OPERATION**

※ 3 in 1 dimming function

- Output constant current level can be adjusted by applying one of the three methodologies between DIM+ and DIM-: 0 ~ 10VDC, or 10V PWM signal or resistance.
- Direct connecting to LEDs is suggested. It is not suitable to be used with additional drivers.
- Dimming source current from power supply: 100 $\mu$ A (typ.)

◎ Applying additive 0 ~ 10VDC

"DO NOT connect "DIM- to -V"

◎ Applying additive 10V PWM signal (frequency range 100Hz ~ 3KHz):

"DO NOT connect "DIM- to -V"

◎ Applying additive resistance:

"DO NOT connect "DIM- to -V"

- Note :
1. Min. dimming level is about 6% and the output current is not defined when 0% < I<sub>out</sub> < 6%.
  2. The output current could drop down to 0% when dimming input is about 0k $\Omega$  or 0Vdc, or 10V PWM signal with 0% duty cycle.
  3. Please do not activate "temperature compensation" when performing dimming operation.

**■ SYNCHRONIZATION OPERATION**

- Synchronization up to 10 drivers (1 master + 9 slaves)
- Maximum cable length between each unit : 20 meter.

NOTE: Please make sure all units are set to 100% dimming setting(factory default) before synchronizing.

**■ TEMPERATURE COMPENSATION OPERATION**

LCM-60 have the built-in temperature compensation function ; by connecting a temperature sensor (NTC resistor) between the +NTC / -NTC terminal of LCM-60 and the detecting point on the lighting system or the surrounding environment, output current of LCM-60 could be correspondingly changed, based on the sensed temperature, to ensure the long life of LED.

**NTC derating curve**

- ⊙ LCM-60 can still be operated normally when the NTC resistor is not connected and the value of output current will be the current level selected through the DIP switch.
- ⊙ NTC reference:

NTC resistance	Output Current
220K	< 60°C, 100% of the rated current (corresponds to the setting current level) > 60°C, output current begins to reduce, please refer to the curve for details.
330K	< 70°C, 100% of the rated current (corresponds to the setting current level) > 70°C, output current begins to reduce, please refer to the curve for details.
470K	< 80°C, 100% of the rated current (corresponds to the setting current level) > 80°C, output current begins to reduce, please refer to the curve for details.

Notes: 1. MEAN WELL does not offer the NTC resistor and all the data above are measured by using THINKING TTC03 series.  
2. If other brands of NTC resistor is applied, please check the temperature curve first.

- ⊙ Dimming and synchronization function of the driver will be invalid when the "temperature compensation" function is in use.

■ **OUTPUT LOAD vs TEMPERATURE**

■ **STATIC CHARACTERISTIC**

※ De-rating is needed under low input voltage.

**TOTAL HARMONIC DISTORTION (THD)**

※ Tcase at 80°C

**POWER FACTOR (PF) CHARACTERISTIC**

※ Tcase at 80°C

**EFFICIENCY vs LOAD**

LCM-60 series possess superior working efficiency that up to 91% can be reached in field applications.

※ Tcase at 80°C
