TPTC004

### Features

- Multi-function single unit battery charger or power supply operation modes selectable
- Output voltage and current adjustable via potentiometer
- 3-stage charging curve for charging mode
- -30~+70°C wide operating temperature
- Multiple protections: Short circuit / Over load / Over voltage / Over temperature
- Thermal controlled DC fan for noise reduction
- Remote ON-OFF control
- Comply with 62368-1+60335-1/-2-29 dual certification
- Suitable for lead-acid (Pb) batteries
- Carry handle accessory available (Order NO.: Carry handle, sold separately)
- 3 years warranty

### Description

NPP-750 is a miniaturized dual-purpose charger and power supply. In addition to being used as a three-stage charger for lead-acid batteries, it can also be used as a constant voltage output power supply to drive general load. The operating mode can be quickly switched by plugging or unplugging a connector on the front panel. Other features include: ultra-wide voltage output, adjustable voltage via VR on the panel (10.5~21V, 21~42V, 42~80V), adjustable charging current (50~100%), built-in intelligent fan with variable speed based on temperature to reduce noise and extend fan lifetime, -30~+70° C wide operating temperature, suitability for use in different environments, built-in remote ON/OFF control, compliance to IEC/EN/UL62368-1 and household EN60335-1/-2-29 dual safety, multiple built-in protections, and 3-year warranty. The NPP-750 is truly an intelligent, safe, and reliable universal dual-purpose charger and power supply with outstanding cost performance.

### Model Encoding

NPP - 750 - 24

### Applications

- Radio system backup solution
- Electric scooter charger
- Camping car \ Buses \ Heavy duty truck \ Specialty vehicles
- Surveillance system
- Industrial automation machinery
- Industrial control system
- Mechanical and electrical equipment

| NOTE                           | <p>1. Modification for charger specification may be required for different battery specification. Please contact battery vendor and MEAN WELL for details.</p> <p>2. All parameters NOT specially mentioned are measured at 230VAC input, rated load and 25°C of ambient temperature.</p> <p>3. Float charge voltage(Vfloat) adjustable via potentiometer in battery charger mode.</p> <p>4. This is MEAN WELL's suggested range. Please consult your battery manufacturer for their suggestions about maximum charging current limitation.</p> <p>5. Derating may be needed under low input voltages. Please check the derating curve for more details.</p> <p>6. The efficiency is measured at 16.8V charge voltage(12V model), 33.6V charge voltage(24V model), 67.2V charge voltage(48V model).</p> <p>7. This protection mechanism is specified for the case the short circuit occurs after the charger is turned on.</p> <p>8. The charger is considered a component which will be installed into a final equipment. All the radiation tests require an additional 13*26*30 NIZN magnetic clasp or magnetic ring to the output line for CLASS B and without NIZN magnetic clasp or magnetic ring for CLASS A. The final equipment must be re-confirmed that it still meets EMC directives. For guidance on how to perform these EMC tests, please refer to "EMI testing of component power supplies." (as available on <a href="http://www.meanwell.com">http://www.meanwell.com</a>)</p> <p>9. The ambient temperature derating of 3.5°C/1000m with fanless models and of 5°C/1000m with fan models for operating altitude higher than 2000m(6500ft).</p> <p>※ Product Liability Disclaimer : For detailed information, please refer to <a href="https://www.meanwell.com/serviceDisclaimer.aspx">https://www.meanwell.com/serviceDisclaimer.aspx</a></p> |  |   |   |

| NOTE                           | <p>1. Modification for charger specification may be required for different battery specification. Please contact battery vendor and MEAN WELL for details.</p> <p>2. All parameters NOT specially mentioned are measured at 230VAC input, rated load and 25°C of ambient temperature.</p> <p>3. Derating may be needed under low input voltages. Please check the derating curve for more details.</p> <p>4. The PSU is considered a component which will be installed into a final equipment. All the radiation tests require an additional 13*26*30 NIZN magnetic clasp or magnetic ring to the output line for CLASS B and without NIZN magnetic clasp or magnetic ring for CLASS A. The final equipment must be re-confirmed that it still meets EMC directives. For guidance on how to perform these EMC tests, please refer to "EMI testing of component power supplies." (as available on <a href="http://www.meanwell.com">http://www.meanwell.com</a>)</p> <p>5. The ambient temperature derating of 3.5°C/1000m with fanless models and of 5°C/1000m with fan models for operating altitude higher than 2000m(6500ft).<br/>           ※ Product Liability Disclaimer : For detailed information, please refer to <a href="https://www.meanwell.com/serviceDisclaimer.aspx">https://www.meanwell.com/serviceDisclaimer.aspx</a></p> |  |  |  |   |              |  |  |

## Block Diagram

## Derating Curve

## Function Manual

### 1. Battery Charger or Power Supply Operation modes selectable via pin3 and pin4 jumper

|                       |                                |
|-----------------------|--------------------------------|
| Between pin3 and pin4 | Operation modes                |
| Jumper connected      | Power supply mode              |
| Jumper removed        | Battery charger mode (Default) |

### 2. Charging Curve (Charging Mode)

© 3 stage charging curve

| State            | NPP-750-12 | NPP-750-24 | NPP-750-48 |
|------------------|------------|------------|------------|
| Constant Current | 43A        | 22.5A      | 11.3A      |
| Vboost           | 14.4V      | 28.8V      | 57.6V      |
| Vfloat           | 13.8V      | 27.6V      | 55.2V      |

© Suitable for lead-acid batteries (flooded, Gel and AGM)

※  $V_o \times I_o$  must be less than or equal to the rated power. Please refer to derating curve (page 4) .

### 3.Charger OK / DC OK Signal

Charger OK / DC OK signal is a TTL level signal.

The maximum sourcing current is 10mA.

| Charger OK / DC OK signal | Charger status                           |
|---------------------------|--|
| "High" : 4.5 ~ 5.5V       | Work normally                            |
| "Low" : -0.5 ~ 0.5V       | Failure or protection function activated |

### 4.Remote ON-OFF Control

The NPP-750 can be turned ON/OFF by using the "Remote Control" function.

| Between pin7 remote ON-OFF and pin8 +12Vaux | Charger status |
|---|----------------|
| Short ( Pin 7 = 10.8 ~ 13.2V)               | ON (Default)   |
| Open ( Pin 7 = -0.5 ~ 0.5V)                 | OFF            |

## Mechanical Specification

Case No.285A Unit:mm

※ Connector Pin No. Assignment : HRS DF11-14DP-2DS or equivalent

| Pin No.   | Assignment  | Mating Housing                 | Terminal                          |
|-----------|---|--------------------------------|-----------------------------------|
| 1,2,11~14 | NC  | HRS DF11-14DS<br>or equivalent | HRS DF11-**-**SC<br>or equivalent |
| 3,4       | Battery Charger or<br>Power Supply mode selectable        |                                |                                   |
| 5         | Battery Full  |                                |                                   |
| 6         | Charger OK (Charger mode) or<br>DC OK (Power supply mode) |                                |                                   |
| 7         | Remote ON-OFF   |                                |                                   |
| 8         | +12V-AUX  |                                |                                   |
| 9,10      | GND-AUX   |                                |                                   |

※ LED Status Table

| Charger (Default) |                                       |
|-------------------|---------------------------------------|
| LED Indicator     | Status                                |
| ● Green           | Float stage (stage 3) or full charged |
| ● Red             | Charging (stage 1 or stage 2)         |
| ○ No Light        | Abnormal                              |
| Power supply mode |                                       |
| LED Indicator     | Status                                |
| ● Green           | Normal working                        |
| ○ No Light        | Abnormal                              |

※ Control Pin No. Assignment : HRS DF11-14DP-2DS or equivalent

|                |                              |
|----------------|------------------------------|
| Mating Housing | HRS DF11-14DS or equivalent  |
| Terminal       | HRS DF11-**-SC or equivalent |

| Pin No.   | Function                       | Description  |
|-----------|--------------------------------|--|
| 1,2,11~14 | NC                             | -----  |
| 3,4       | Battery charger / Power supply | Open: Battery charger, Color of LED loading indicator: Reference to battery charger.<br>Short: Power supply, Color of LED loading indicator :Green.  |
| 5         | Battery Full                   | Battery Full Signal, referenced to GND-AUX(Pin 9 & 10).<br>The Signal is a TTL level signal. The maximum sourcing current is 10mA and only for output.(Note.2)<br>Low (-0.5 ~ 0.5V) : When the battery is charging.<br>High (4.5 ~ 5.5V) : When the battery is full.   |
| 6         | Charger OK / DC OK             | Charger OK / DC OK Signal, referenced to GND-AUX(Pin 9 & 10).<br>The Signal is a TTL level signal. The maximum sourcing current is 10mA and only for output.(Note.2)<br>Low (-0.5 ~ 0.5V) : When the charger fails or the protect function is activating.<br>High (4.5 ~ 5.5V) : When the charger is working properly. |
| 7         | Remote ON-OFF                  | Remote charger ON/OFF Function.<br>The charger can turn the output ON/OFF by dry contact between Remote ON-OFF and +12V-AUX.(Note.2)<br>Short (10.8 ~ 13.2V) : Charger ON ; Open(-0.5 ~ 0.5V) : Charger OFF ; The maximum input voltage is 13.2V.  |
| 8         | +12V-AUX                       | It is controlled by the Remote ON-OFF control.   |
| 9,10      | GND-AUX                        | The signal return is isolated from the output terminal. (+V & -V)  |

Note1: Non-isolated signal, referenced to [GND(signal)].

Note2: Isolated signal, referenced to GND-AUX

**■ Accessory List**

※ Battery Charger or Power Supply mode of pin 3 and pin 4 mating pin along with NPP-750 (Standard accessory)

| Pin 3 and Pin 4 mating pin              | Quantity |
|---|----------|
| <p>1FF1HMJ20-020-95BS or equivalent</p> | 1        |

※ Carry handle (Optional accessory, battery charger and pull handle should be ordered seperately)

| MW's Order No. | Item |   | Quantity |
|----------------|------|---|----------|
| Carry Handle   | ①    | Handle    | 1        |
|                | ②    | Foot pad  | 4        |
|                | ③    | Screw     | 2        |

① Handle

② Foot pad
